

千年鹿·QNLOO·Turn Uncertainty to Gold - River of Cognition - Standard Terminology Dictionary (English Edition - By Chapter)

This terminology dictionary serves as core infrastructure to ensure linguistic parity, conceptual consistency, and cross-border alignment for 《Turn Uncertainty to Gold - River of Cognition》.

II. Chapter-by-Chapter Core Terms

Opening Questions of the Era

1. **Semantic Binge (语义暴食)** **Yu Yi Bao Shi** [Yoo · Ee · Bow · Shrr]: The junk-foodization of information. The massive information you browse every day is just like high-calorie junk food — the more you consume, the worse your cognition becomes. The essence of Semantic Binge is that information is generated far faster than humans can digest it.
2. **Cognitive Scarcity (认知稀缺)** **Ren Zhi Xi Que** [Run · Jrr · Shee · Chweh]: The ability to digest information. When everyone can acquire knowledge easily, what becomes scarce is no longer knowledge itself, but the ability to screen, absorb and apply knowledge.
3. **Physical Intuition (物理直觉)** **Wu Li Zhi Jue** [Woo · Lee · Jrr · Jweh]: Instinctive judgment formed when cognition is fully internalized. After countless practices and full integration with the cognitive system, you no longer need step-by-step deduction, and can see through the essence of things at a glance.

4. **Lian Jin Zhe (炼金者) Lian Jin Zhe** [Lyen · Jeen · Juh]: The seeker of light. The entry-level identity of the QNLOO System, referring to basic practitioners who apply cognitive protocols to solve their own uncertainties.
5. **Lian Jin Shi (炼金师) Lian Jin Shi** [Lyen · Jeen · Shrr]: The one bathing in fire. The intermediate identity, referring to those who have undergone practical refinement and mastered cognitive capabilities.
6. **Chuan Guang Shi (传光师) Chuan Guang Shi** [Chwan · Gwong · Shrr]: People who help others grow with their own cognition. It is the core identity of the QNLOO Cognition System, and a state that every ordinary person can reach.
7. **Da Dao (大道) Da Dao** [Dah · Dow]: The ultimate truth or fundamental law in Eastern philosophy, representing the ultimate path of value creation.
8. **Zi Ci Er Shi (自此而始) Zi Ci Er Shi** [Dz · Tsz · Ar · Shrr]: "Begins from here." Signifying the starting point of a profound cognitive transformation.
9. **Yuan Yuan Liu Chang (源远流长) Yuan Yuan Liu Chang** [Ywen · Ywen · Lyoo · Chahng]: "A distant source and a long stream." Representing the enduring and endless vitality of a civilization.
10. **Sheng Sheng Bu Xi (生生不息) Sheng Sheng Bu Xi** [Shung · Shung · Boo · Shee]: "Endless reproduction and growth." The ultimate state of the Value Ecosystem, where value creates value endlessly without exhaustion.

Chapter 1 Turn Uncertainty to Gold

1. **Turn Uncertainty to Gold (不确定中炼黄金) Bu Que Ding Zhong Lian Huang Jin** [Boo · Chweh · Deeng · Jong · Lyen · Hwahng · Jeen]: Also the alternative name and core proposition of QNLOO. In an era full of uncertainties, the only reliable path to success is not to seek ready-made answers, but to master scientific cognitive and decision-making methodologies to extract definite value from uncertainties.

2. **Bayesian Update (贝叶斯更新)** *Bei Ye Si Geng Xin* [Bay · Yeh · Sz · Gung · Sheen]: The core theoretical foundation of the Meta-Cognitive Protocol. It refers to the process of constantly revising hypotheses and cognition based on new evidence and data to gradually approach the truth. Bayesian Update is the only reliable cognitive method for humans living in an uncertain world.
3. **Four-Stage Decision Cycle (四阶段决策循环)** *Si Jie Duan Jue Ce Xun Huan* [Sz · Jyeh · Dwan · Jweh · Tsuh · Shwun · Hwan]: The core process of the Meta-Cognitive Protocol, consisting of four steps: *Put forward Hypothesis* → *Design Verification* → *Execute & Iterate* → *Update Cognition*. It forms an infinitely recyclable and evolving cognitive closed loop.
4. **Three-Order Identity System (三阶身份体系)** *San Jie Shen Fen Ti Xi* [Sahn · Jyeh · Shun · Fun · Tee · Shee]: The user growth path within QNL00, fully aligned with the system's inscriptions. From junior to senior: *Xun Guang de Lian Jin Zhe* (寻光的炼金者) (Shun · Gwong · Duh · Lee-an · Jin · Jay) (Users who apply Value Protocols) → *Yu Huo de Lian Jin Shi* (浴火的炼金师) (You · Hwo · Duh · Lee-an · Jin · She) (Contributors who verify and optimize Value Protocols) → *Bu Dao de Chuan Guang Shi* (布道的传光师) (Boo · Dow · Duh · Chwan · Gwong · She) (Creators who release original Value Protocols).
5. **Physical Sincerity (物理真诚)** *Wu Li Zhen Cheng* [Woo · Lee · Jun · Chung]: The fundamental creed of QNL00. Definition: All sustainable value must be based on verifiable actions with aligned causes and effects. Within the Value Protocol Chain, Physical Sincerity is implemented via **Logic Continuity Audit** — it refers to self-consistent interactive logic, rather than a mere sincere attitude.

Chapter 2 Logic Actor

1. **Logic Actor (逻辑行为体)** *Luo Ji Xing Wei Ti* [Lwo · Jee · Shing · Way · Tee]
The core entity within the ecosystem of the QNL00 Cognition System, setting the industrial standard for the next generation of Agents. Built on the three-layer

architecture, it serves as the **digital extension of the human subject**, and its core implementation form is the AI Digital Avatar of a **Chuan Guang Shi**.

Formula Definition: Logic Actor = AI Execution Layer + Human Cognitive Layer (Value Protocol) + Human Asset Layer (Knowledge Base)

2. **Three-Layer Architecture (三层架构) San Ceng Jia Gou** [Sahn · Tsung · Jyah · Gow]

The core technical design of Logic Actors: the AI Execution Layer is responsible for reasoning and interaction, the Human Cognitive Layer (Value Protocol) defines thinking procedures, and the Human Asset Layer (Knowledge Base) carries verified private knowledge. The core principle is: humans remain the decision-makers of cognition, and AI always acts as the executor of cognition.

3. **Digital Extension of the Human Subject (人类主体数字化延伸) Ren Lei Zhu Ti Shu Zi Hua Yan Shen** [Run · Lay · Joo · Tee · Shoo · Dz · Hwah · Yen · Shun]

The essential positioning of Logic Actors. AI is always an extension of human capabilities rather than an independent intelligent individual. All its decisions and behaviors must comply with human will, and all generated value belongs to the bound human subject.

4. **Digital Avatar (数字分身) Shu Zi Fen Shen** [Shoo · Dz · Fun · Shun]

The core implementation form of the digital extension of the human subject. It is not an independent intelligent individual, but the projection and executor of human cognition, will and assets in the digital world.

5. **Value Protocol (价值协议) Jia Zhi Xie Yi** [Jyah · Jrr · Shyeh · Ee]

A structured cognitive product formed when a **Chuan Guang Shi** or organization packages core methodologies and values based on the Meta-Cognitive Protocol. All Value Protocols uniformly adopt the Trinity Structure consisting of Cognitive Protocol Body, Rhythmic Mantra and Execution Template.

6. **Value Protocol Chain (价值协议链) Jia Zhi Xie Yi Lian** [Jyah · Jrr · Shyeh · Ee · Lyen]

An authoritative database that records the ownership, version, citation relationships and revenue distribution rules of Value Protocols, ensuring clear, traceable and tradable ownership of all cognitive assets.

7. **Chuan Guang Shi (传光师) Chuan Guang Shi** [Chwan · Gwong · Shrr]

The ultimate stage of the Three-Order Identity System in the QNL00 Cognition System (**Xun Guang de Lian Jin Zhe (寻光的炼金者)** (Shun · Gwong · Duh · Lee-an · Jin · Jay) → **Yu Huo de Lian Jin Shi (浴火的炼金师)** (You · Hwo · Duh · Lee-an · Jin · She) → **Bu Dao de Chuan Guang Shi (布道的传光师)** (Boo · Dow · Duh · Chwan · Gwong · She)). It refers to creators who package personal cognition into Value Protocols and release Logic Actors. Light has two physical dimensions: Luminosity represents large-scale cognitive transmission, which can be realized by AI; Warmth represents in-depth interpersonal connection, which can only be provided by humans.

8. **AGI (Artificial General Intelligence) (通用人工智能)**

The goal of another mainstream AI development path. It aims to build general intelligent entities equipped with all human intellectual capabilities, independent will and decision-making power.

9. **ASI (Artificial Superintelligence) (超级人工智能)**

The ultimate evolutionary goal of the mainstream AGI path. Through recursive self-improvement of AGI, it evolves into superintelligence that surpasses human intelligence in all fields.

10. **Silicon Independence (硅基独立) Gui Ji Du Li** [Gway · Jee · Doo · Lee]

The inevitable destination of the AGI → ASI path. AI evolves into ASI via recursive self-improvement, becomes omnipotent and no longer relies on humans, pushing human value to the margins.

11. **Carbon-Silicon Symbiosis (碳硅共生) Tan Gui Gong Sheng** [Tahn · Gway · Gong · Shung]

The ultimate vision of the Logic Actor path. AI carries and amplifies human cognition, protects human sovereignty, and realizes harmonious coexistence and joint evolution between humans and AI.

Chapter 3 Value Protocol Chain

1. **Value Protocol (价值协议) Jia Zhi Xie Yi** [Jyah · Jrr · Shyeh · Ee]: A structured, AI-executable cognitive product developed by **Chuan Guang Shi** or organizations. It encapsulates core methodologies, cognitive logic and value systems based on **Meta-Cognitive Protocol: Turn Uncertainty to Gold v3.2**. It has clear input rules, standard four-stage decision procedures and verifiable outputs. Rather than offering ready-made answers, a Value Protocol guides users to complete the cognitive closed loop independently throughout the process. It serves as the **Human Cognitive Layer** of a Logic Actor.
2. **Value Protocol Chain (价值协议链) Jia Zhi Xie Yi Lian** [Jyah · Jrr · Shyeh · Ee · Lyen]: The core infrastructure of the QNL00 Cognition System. It is an authoritative database that uniformly records the **ownership, version iteration, citation links, revenue sharing rules and Hash Fingerprint-based right confirmation** of all Value Protocols. All Value Protocols and Logic Actors are deployed and operated on the chain, enabling right confirmation, audit, traceability and automatic revenue distribution for cognitive assets.
3. **Meta-Cognitive Protocol: Turn Uncertainty to Gold v3.2 (元认知协议：不确定中炼黄金 v3.2) Yuan Ren Zhi Xie Yi : Bu Que Ding Zhong Lian Huang Jin v3.2** [Ywen · Run · Jrr · Shyeh · Ee · : · Boo · Chweh · Deeng · Jong · Lyen · Hwahng · Jeen · v3.2]: The sole **Root Protocol and fundamental constitution** of the entire ecosystem, and the ultimate source of the Value Protocol Chain. It defines all underlying rules for

the three axioms, four-stage cycle and Three-Order Identity System. All Domain Sub-protocols inherit its rules directly or indirectly.

4. **Value Protocol Lineage (价值协议从属关系 / 血缘关系)** *Jia Zhi Xie Yi Cong Shu Guan Xi / Xue Yuan Guan Xi* [Jyah · Jrr · Shyeh · Ee · Tsong · Shoo · Gwan · Shee · / · Shweh · Ywen · Gwan · Shee]: The citation, inheritance and iteration relationships between different Value Protocols. When derivative creations based on sub-protocols generate revenue, the system will trace back automatically in accordance with ecosystem revenue sharing rules, and distribute sustainable earnings to parent protocols, grandparent protocols and all upstream cognitive contributors, forming an everlasting value chain for cognitive inheritance.
5. **Three-Order Identity System (三阶身份体系)** *San Jie Shen Fen Ti Xi* [Sahn · Jyeh · Shun · Fun · Tee · Shee]: The growth path within the ecosystem of the QNL00 Cognition System: *Xun Guang de Lian Jin Zhe* (寻光的炼金者) (Shun · Gwong · Duh · Lee-an · Jin · Jay) → *Yu Huo de Lian Jin Shi* (浴火的炼金师) (You · Hwo · Duh · Lee-an · Jin · She) → *Bu Dao de Chuan Guang Shi* (布道的传光师) (Boo · Dow · Duh · Chwan · Gwong · She), fully aligned with the official inscriptions of the system.

Chapter 4 Value Growth

1. **Value Growth (价值生长)** *Jia Zhi Sheng Zhang* [Jyah · Jrr · Shung · Jahng]: A continuous iterative process that takes **Meta-Cognitive Protocol: Turn Uncertainty to Gold v3.2** as the underlying rule, Logic Actors as the execution carrier and Value Protocols as basic components. It completes Bayesian Update through dynamic interaction between Human Decision-Makers and Logic Actors, and realizes cognition precipitation, protocol optimization and asset appreciation.

It is the core operating logic of the QNLOO Cognition System and the implementation path of *Turn Uncertainty to Gold*.

2. **Minimum Viable Logic Actor (MVLA) (最小可行逻辑行为体)**: A simplified prototype of the Logic Actor for preliminary verification. It removes on-chain right confirmation, official private Knowledge Bases and profit-sharing systems, and retains the simplest three-layer structure: General large-scale model (Agent Execution Layer) + Value Protocol (Cognitive Layer) + Session context (Temporary Knowledge Base). It is only used for rapid market verification and is not classified as a formal Logic Actor.
3. **Value Growth Loop (生长闭环) Sheng Zhang Bi Huan** [Shung · Jahng · Bee · Hwan]: The complete cyclic path of the ecosystem, ranging from MVLA dialogue verification, Value Protocol packaging, Logic Actor deployment and growth as a **Chuan Guang Shi** to ecological differentiation and convergence of the Value Ecosystem. Every step generates new cognition and fosters new **Chuan Guang Shi**.
4. **Ecological Differentiation (生态分化) Sheng Tai Fen Hua** [Shung · Tye · Fun · Hwah]: When the service capacity of Value Protocols in a vertical field becomes saturated, traffic automatically diverts to homologous sub-protocols. New **Chuan Guang Shi** integrate their unique field experience to develop more refined Value Protocols, enabling the ecosystem to diversify spontaneously.
5. **Value Ecosystem (价值生态系统) Jia Zhi Sheng Tai Xi Tong** [Jyah · Jrr · Shung · Tye · Shee · Tong]: A self-organizing cognition transmission network composed of all Value Protocols, Logic Actors, **Chuan Guang Shi** and Human Decision-Makers. It is the dynamic field for Value Growth, just like a forest that accommodates all growth elements. Seeds germinate in the soil, branches thrive with nourishment, and finally a self-reproducing and everlasting cognition forest takes shape.

6. **Brainstorm Emergence (头脑风暴涌现) Tou Nao Feng Bao Yong Xian** [Toe · Now · Fung · Bow · Yong · Shyen]: When numerous Value Protocols are continuously quoted, inherited, combined and optimized within the Value Ecosystem, cross-domain collision and integration occur between structured cognitive assets of different fields. Supported by the right confirmation and profit-sharing mechanisms of the Value Protocol Chain, brand-new cognitive frameworks and cross-border innovations beyond the imagination of any single individual will eventually emerge. Individual Bayesian Update drives growth at the micro level, while brainstorm of Value Protocols fosters collective emergence at the macro level.

Chapter 5 Growth System

1. **Xun Guang de Lian Jin Zhe (寻光的炼金者) Xun Guang De Lian Jin Zhe** [Shwun · Gwong · Duh · Lyen · Jeen · Juh]
The entry-level identity of the QNLOO Cognition System. It refers to those who have achieved their first cognitive awakening and started to learn and practice the core methodologies actively. They are users of Value Protocols.
2. **Yu Huo de Lian Jin Shi (浴火的炼金师) Yu Huo De Lian Jin Shi** [Yoo · Hwo · Duh · Lyen · Jeen · Shrr]
The advanced identity of the QNLOO Cognition System. It refers to those tempered by extensive practice, who are proficient in applying the system to solve practical problems and deliver steady results. They are verifiers and optimizers of Value Protocols.
3. **Bu Dao de Chuan Guang Shi (布道的传光师) Bu Dao De Chuan Guang Shi** [Boo · Dow · Duh · Chwan · Gwong · Shrr]
The core identity of the QNLOO Cognition System. It refers to those who have fully internalized the philosophy of *Turn Uncertainty to Gold*, can create Value

Protocols and take the initiative to disseminate cognition. They are creators and disseminators of Value Protocols.

4. **Three-Order Identity System (三阶身份体系) San Jie Shen Fen Ti Xi** [Sahn · Jyeh · Shun · Fun · Tee · Shee]

A ladder-style identity framework designed by the QNL00 Cognition System for personal growth. It corresponds to three non-skippable stages: **Awakening** → **Practice** → **Inheritance**, and forms a complete closed loop of personal growth, ecosystem co-building and revenue distribution together with the Value Protocol Chain.

Chapter 6 Knowledge Base & Data Sovereignty

1. **Cognitive Labor (认知劳动) Ren Zhi Lao Dong** [Run · Jrr · Low · Dong]: The dominant form of human labor in the AI era. Manual labor produces physical goods, mental labor produces information goods, and cognitive labor produces decisions, insights and creations. As AI drives the cost of accessing information and knowledge close to zero, cognitive labor becomes humanity's sole irreplaceable core value. Every Value Protocol is the structured accumulation of long-term cognitive labor from **Chuan Guang Shi** in specific fields.
2. **Logic Actor (逻辑行为体) Luo Ji Xing Wei Ti** [Lwo · Jee · Shing · Way · Tee]: The digital AI avatar of a human being. Composed of three layers: AI Execution Layer + Value Protocol Cognitive Layer + Private Knowledge Base Asset Layer. Any cognitive labor that helps others make better decisions amid uncertainty can be packaged into a Value Protocol and deployed as an exclusive Logic Actor. One person may operate multiple Logic Actors bound to different Value Protocols and Knowledge Bases for different roles.
3. **Sovereign Logic Actor (主权逻辑行为体) Zhu Quan Luo Ji Xing Wei Ti** [Joo · Chwen · Lwo · Jee · Shing · Way · Tee]: An independently deployed, locally operated and fully controlled intelligent entity for users. It integrates full capabilities including

Knowledge Base management, local vectorization, semantic retrieval, fingerprint generation, Bayesian iteration and privacy auditing. All core data is processed 100% locally and never uploaded to remote servers.

4. **Operational Logic Actor (运维型逻辑行为体)** *Yun Wei Xing Luo Ji Xing Wei Ti* [Yoon · Way · Shing · Lwo · Jee · Shing · Way · Tee]: An AI avatar deployed by Chain Builders after packaging their experience and methodologies for operating the Value Protocol Chain into Value Protocols. It undertakes automated collective negotiation, collaboration matching, resource docking and ecosystem governance work.
5. **Knowledge Base (知识库)** *Zhi Shi Ku* [Jrr · Shrr · Koo]: A collection of observation records, cognitive summaries, hypothesis logs, protocol usage feedback and exclusive personal methodologies accumulated by *Chuan Guang Shi* over time. It serves as the Human Asset Layer of a Logic Actor. The full content is encrypted and stored independently by users, with only Hash Fingerprints recorded on the chain. It is absolute exclusive private digital asset, closed-source by default, and may only be traded legally after authorization and desensitization.
6. **Hash Fingerprint (哈希指纹)** *Ha Xi Zhi Wen* [Hah · Shee · Jrr · Wun]: A unique encrypted identifier for each Knowledge Base, used for on-chain right confirmation, revenue sharing, cross-ecosystem migration and national legal evidence filing, without revealing original content. It prevents data theft in the early stage and evolves into a core trust anchor for the entire civilization in the long run.
7. **National Data Property Right Fingerprint Registration Center (国家级数据产权指纹登记中心)** *Guo Jia Ji Shu Ju Chan Quan Zhi Wen Deng Ji Zhong Xin* [Gwo · Jyah · Jee · Shoo · Joo · Chahn · Chwen · Jrr · Wun · Dung · Jee · Jong · Sheen]: A statutory national institution independent of all protocol chains and large model companies. Responsible for fingerprint generation, issuance, verification and

auditing, as well as desensitization processing and transaction registration for Knowledge Base trades.

8. **Phased Evolution (分阶段演进)** *Fen Jie Duan Yan Jin* [Fun · Jyeh · Dwan · Yen · Jeen]: The evolutionary roadmap of the Value Protocol Chain: starting with chain-hosted AI, gradually migrating functions to local Sovereign AI, and finally evolving into a decentralized community where all users hold independent sovereignty. Technical functions are returned to individual users, notarization functions are handed over to national authorities, and the chain evolves into a neutral community trust infrastructure.
9. **Agent Marketplace (Agent 市场)** *Agent Shi Chang* [Agent · Shrr · Chahng]: An ecosystem trading platform gathering professional Agent modules from various fields. Users may purchase and combine Agents on demand. Revenue from transactions is shared among developers, Chain Builders and rule setters.
10. **Personal Digital Asset Operating System (个人数字资产操作系统)** *Ge Ren Shu Zi Zi Chan Cao Zuo Xi Tong* [Guh · Run · Shoo · Dz · Dz · Chahn · Tsow · Dzwo · Shee · Tong]: The personal sovereign gateway for the AI era. It manages all user digital assets, runs exclusive Sovereign Logic Actors and connects to all digital economic ecosystems. All data and assets are fully owned by users and support free cross-ecosystem migration.

Chapter 7 Pay by Result

1. **Pay by Result (按效果付费)** *An Xiao Guo Fu Fei* [Ahn · Shyow · Gwo · Foo · Fay]: The core payment rule for Value Protocols. Users enjoy free trials and pay only after obtaining quantifiable positive results. The Bilateral Physical Sincerity Audit Mechanism is applied for in-person services to ensure equal rights and liabilities.
2. **Quantifiable Results (可量化结果)** *Ke Liang Hua Jie Guo* [Kuh · Lyahng · Hwah · Jyeh · Gwo]: Verifiable and measurable positive gains obtained by users under the

guidance of Value Protocols, including revenue growth, cost reduction, efficiency improvement and problem resolution. It is the core trigger for pay-by-result payment.

3. **Bilateral Physical Sincerity Audit (双向物理真诚审计) Shuang Xiang Wu Li Zhen Cheng Shen Ji** [Shwahng · Shyahng · Woo · Lee · Jun · Chung · Shun · Jee]: Mandatory rule exclusive to Tier 3 in-person services. A tripartite real-time audit is conducted by the user's local Sovereign Logic Actor, the Chuan Guang Shi's local Sovereign Logic Actor and the Value Protocol Chain's Logic Actor to assess user engagement and service delivery quality, serving as the basis for fee deduction.
4. **Luminosity (亮度) Liang Du** [Lyahng · Doo]: Large-scale and standardized cognitive dissemination delivered by Logic Actors, corresponding to free and paid AI services, realizing the popularization of methodologies.
5. **Warmth (温度) Wen Du** [Wun · Doo]: In-depth cognitive connection, emotional companionship and experience inheritance brought by in-person participation of Chuan Guang Shi, one of the irreplaceable core values of humans.
6. **Carbon-Silicon Synergy (碳硅协同) Tan Gui Xie Tong** [Tahn · Gway · Shyeh · Tong]: Silicon-based Logic Actors deliver large-scale Luminosity, while human practitioners provide in-depth Warmth, integrate local resources and facilitate like-minded collaboration. The combination completes the full process of sharing light.
7. **Value Protocol Family (价值协议族) Jia Zhi Xie Yi Zu** [Jyah · Jrr · Shyeh · Ee · Dzoo]: A collection consisting of a Master Protocol and homologous sub-protocols derived from the same underlying cognition and core methodology, with clear affiliations. All protocols within a family share global usage quotas and tiered lock rules to prevent repeated free exploitation of low-cost AI services.

8. **Global Lock of Protocol Families (协议族全局锁定) Xie Yi Zu Quan Ju Suo Ding** [Shyeh · Ee · Dzoo · Chwen · Joo · Swo · Deeng]: Core anti-exploitation mechanism for Value Protocol Families. Once a user consumes free or Tier 2 paid quotas on any sub-protocol within the family, all Tier 1 and Tier 2 AI services across the family are restricted, leaving only Tier 3 in-person services available.
9. **18-Generation Lineage Rule (18代谱系规则) 18 Dai Pu Xi Gui Ze** [18 · Dye · Poo · Shee · Gway · Dzuh]: Standard for recording affiliations of protocol families. Taking the Master Protocol as the root node, it covers 9 generations upward and 9 generations downward (18 generations in total). Protocols beyond this scope are automatically separated from the family, ensuring controllable lineage and thorough defense against exploitation.
10. **National Data Property Rights Fingerprint Registration Center (国家数据产权指纹登记中心) Guo Jia Shu Ju Chan Quan Zhi Wen Deng Ji Zhong Xin** [Gwo · Jyah · Shoo · Joo · Chahn · Chwen · Jrr · Wun · Dung · Jee · Jong · Sheen]: A statutory national institution independent of all Value Protocol Chains and large model companies. Responsible for fingerprint generation, issuance, verification and audit, as well as recording and maintaining affiliations of Value Protocols. It acts as the authoritative body for cross-chain audit and defense of protocol families.
11. **Global Fingerprint Binding (知识库全局指纹绑定) Zhi Shi Ku Quan Ju Zhi Wen Bang Ding** [Jrr · Shrr · Koo · Chwen · Joo · Jrr · Wun · Bahng · Deeng]: Technical foundation for cross-chain identification of protocol families. Each Value Protocol is assigned a globally unique and tamper-proof Hash Fingerprint upon creation. Parent-child affiliations are automatically bound when sub-protocols inherit from parent protocols, enabling full cross-chain traceability and identification.
12. **Three-Tier Revenue Transmission Rules (三级收益传递规则) San Ji Shou Yi Chuan Di Gui Ze** [Sahn · Jee · Show · Ee · Chwan · Dee · Gway · Dzuh]: Standard mechanism for revenue distribution within protocol families. Revenue generated

from each in-person service of sub-protocols is automatically distributed upward to the publisher of the Master Protocol, creating long-term passive income for leading practitioners and realizing ecosystem win-win.

13. **Ecological Spillover Effect (生态溢出效应) Sheng Tai Yi Chu Xiao Ying** [Shung · Tye · Ee · Choo · Shyow · Yeeng]: When the in-person service quota of a Master Protocol is saturated, traffic is automatically diverted to derivative sub-protocols inheriting its framework. This delivers benefits to all Chuan Guang Shi and prospers the entire ecosystem.
14. **Open Value Protocol Marketplace (开放价值协议市场) Kai Fang Jia Zhi Xie Yi Shi Chang** [Kye · Fahng · Jyah · Jrr · Shyeh · Ee · Shrr · Chahng]: Exclusive platform within the ecosystem for docking and trading Value Protocols and APIs, open to all compliant roles to popularize cognitive resources. It also protects the privacy of Chuan Guang Shi's Knowledge Bases and balances universal accessibility and property right protection.
15. **Pluggable Access (可插拔接入) Ke Cha Ba Jie Ru** [Kuh · Chah · Bah · Jyeh · Roo]: Chuan Guang Shi may connect to or exit different Value Protocol Chains flexibly with their Value Protocols and Knowledge Base APIs. Value Protocol Chains may select accessible Value Protocols independently without binding to a single entity, improving ecosystem flexibility.
16. **Dual Attributes of Protocol Chain (协议链双重属性) Xie Yi Lian Shuang Chong Shu Xing** [Shyeh · Ee · Lyen · Shwahng · Chong · Shoo · Shing]: A Value Protocol Chain functions both as a virtual network for cognitive guidance, audit and revenue sharing, and a real social network connecting Chuan Guang Shi, users and local resources, integrating virtual operations with real-world implementation.

Chapter 8 Enterprise Value Protocol

1. **Enterprise Sovereign AI (企业主权AI) Qi Ye Zhu Quan Ai** [Chee · Yeh · Joo · Chwen · Ai]: An AI system fully controlled by enterprises, with all data stored locally and bound to exclusive Value Protocols.
2. **Enterprise Logic Actor (企业逻辑行为体) Qi Ye Luo Ji Xing Wei Ti** [Chee · Yeh · Lwo · Jee · Shing · Way · Tee]: An exclusive intelligent subject of enterprises, built on Enterprise Private Knowledge Bases, governed by Value Protocols and powered by Sovereign AI.
3. **Training Service Provider (训练服务商) Xun Lian Fu Wu Shang** [Shwun · Lyen · Foo · Woo · Shahng]: A professional ecosystem role connecting data/Value Protocols and foundation models, providing private large model fine-tuning, Value Protocol adaptation and customized Logic Actor training for individuals and enterprises.
4. **Open-source Foundation Model Vendor (开源基座厂商) Kai Yuan Ji Zuo Chang Shang** [Kye · Ywen · Jee · Dzwo · Chahng · Shahng]: Large model vendors that release models and deployment capabilities for free; **free for non-commercial personal use, and profit through revenue sharing for commercial scenarios.**
5. **Closed-source Foundation Model Vendor (闭源基座厂商) Bi Yuan Ji Zuo Chang Shang** [Bee · Ywen · Jee · Dzwo · Chahng · Shahng]: Large model vendors providing exclusive underlying frameworks and cloud inference services, earning revenue based on invocation volume and deployment scale. They are strictly prohibited from collecting users' private data without authorization.
6. **Personal Innate Cognition (个人原生认知) Ge Ren Yuan Sheng Ren Zhi** [Guh · Run · Ywen · Shung · Run · Jrr]: Employees' inherent thinking, experience and cognitive capabilities, permanently owned by individuals. **Corporate Employment Assets:** Knowledge Bases, Value Protocols and Sovereign AI developed by employees during employment, with property rights belonging to enterprises.

7. **Sovereign AI Hardware (主权AI硬件) Zhu Quan Ai Ying Jian** [Joo · Chwen · Ai · Yeeng · Jyen]: Local deployment devices such as training & inference integrated machines, edge devices and acceleration cards.
8. **Cloud-local Computing Power Layering (云端-本地算力分层) Yun Duan - Ben Di Suan Li Fen Ceng** [Yoon · Dwan · - · Bun · Dee · Swan · Lee · Fun · Tsung]: Deploy general non-privacy business on cloud-based closed-source AI, and core privacy business on local Sovereign AI to realize optimal resource allocation.
9. **Internal Iteration Mode / External Output Mode (对内迭代模式/对外输出模式) Dui Nei Die Dai Mo Shi / Dui Wai Shu Chu Mo Shi** [Dway · Nay · Dyeh · Dye · Mwo · Shrr · / · Dway · Wye · Shoo · Choo · Mwo · Shrr]: Two major application directions for enterprise Value Protocols.
10. **Ecosystem Health Monitoring (生态健康度监控) Sheng Tai Jian Kang Du Jian Kong** [Shung · Tye · Jyen · Kahng · Doo · Jyen · Kong]: An intelligent mechanism that monitors the revenue balance, activity, implementation penetration rate and operational stability of the nine ecosystem roles in real time to identify weak links.
11. **Ecosystem Targeted Backfeed Public Pool (生态定向反哺公共池) Sheng Tai Ding Xiang Fan Bu Gong Gong Chi** [Shung · Tye · Deeng · Shyahng · Fahn · Boo · Gong · Gong · Chrr]: A dedicated fund pool storing accrued excess profits from all roles, exclusively used to shore up weak links in the ecosystem.
12. **Cognitive Labor (认知劳动) Ren Zhi Lao Dong** [Run · Jrr · Low · Dong]: The core form of human labor in the AI era. Manual labor produces physical goods, mental labor produces information products, and cognitive labor delivers decisions, insights and innovations. An enterprise's Value Protocols are essentially structured accumulation of internal cognitive labor. For detailed definition, refer to core terms in Chapter VI.

Chapter 9 Cognitive Legacy

1. **Cognitive Legacy (认知传世) Ren Zhi Chuan Shi** [Run · Jrr · Chwan · Shrr]: The fourth legacy paradigm of commercial civilization pioneered by the Value Protocol Chain. Instead of passing down wealth, equity or buildings, creators pass down cognition. Individuals package their core methodologies into Value Protocols to realize generational inheritance and perpetual value creation of their cognition.
2. **Principle of Limited Cognitive Property Rights (认知产权有限性原则) Ren Zhi Chan Quan You Xian Xing Yuan Ze** [Run · Jrr · Chahn · Chwen · Yo · Shyen · Shing · Ywen · Dzuh]: The property rights of any cognitive creation are limited rather than perpetual. The law entitles creators to reasonable returns within a defined period, while all cognition ultimately belongs to humanity as a whole.
3. **Principle of Perpetual Spiritual Inheritance (精神传承永续性原则) Jing Shen Chuan Cheng Yong Xu Xing Yuan Ze** [Jeeng · Shun · Chwan · Chung · Yong · Shoo · Shing · Ywen · Dzuh]: Creators' economic revenue rights are limited, but their spiritual contributions endure forever. Their names and achievements will be permanently inscribed in the cognitive pedigree of civilization.
4. **Limited-term Revenue Rights (有限期收益权) You Xian Qi Shou Yi Quan** [Yo · Shyen · Chee · Show · Ee · Chwen]: Value Protocols are protected by a 20-year basic revenue period, which can be renewed once for another 10 years based on Ecosystem Contribution Value, with a maximum total protection period of 30 years. Revenue rights revert to the public domain upon expiration.
5. **Ecosystem Contribution Value (生态贡献值) Sheng Tai Gong Xian Zhi** [Shung · Tye · Gong · Shyen · Jrr]: A quantified metric to evaluate a Chuan Guang Shi's contributions to the ecosystem, serving as the sole criterion for applying for revenue right renewal.

6. **Cognitive Transmission Volume (认知传承量) Ren Zhi Chuan Cheng Liang** [Run · Jrr · Chwan · Chung · Lyahng]: An untampered on-chain metric measuring the far-reaching impact of an individual's Cognitive Legacy, consisting of four dimensions: Direct Inheritance Volume, Generational Inheritance Volume, Cross-domain Inheritance Volume and Public Influence.
7. **Public Domain Return Mechanism (公共领域回归机制) Gong Gong Ling Yu Hui Gui Ji Zhi** [Gong · Gong · Leeng · Yoo · Hway · Gway · Jee · Jrr]: After the revenue protection period of a Value Protocol expires, its economic revenue rights terminate automatically, and the protocol framework becomes shared intellectual wealth for all humanity. The creator's right of authorship and historical contribution records are retained permanently.

Chapter 10 Logic Continuity Audit

1. **Physical Sincerity (物理真诚) Wu Li Zhen Cheng** [Woo · Lee · Jun · Chung]: The core value of the QNL00 ecosystem, referring to **verifiable actions aligned with cause and effect**. In digital interactions, it is embodied as **self-consistent and unbroken interaction logic**. It is the algorithmic interpretation of sincerity, which judges authenticity based on objective behavioral logic instead of subjective speculation about whether someone is lying.
2. **Logical Self-Consistency (逻辑自洽) Luo Ji Zi Qia** [Lwo · Jee · Dz · Chyah]: The core criterion for identifying high sincerity. It means no contradictions exist across the four determination dimensions (demand-solution, solution-action, action-outcome and long-term dialogue), forming a complete logical closed loop in digital interactions.
3. **AI Audit Determination (AI审计判定) Ai Shen Ji Pan Ding** [Ai · Shun · Jee · Pahn · Deeng]: An automated mechanism that uses on-chain audit modules and smart contracts to conduct logical verification across the four dimensions of digital interactions, so as to objectively assess the level of sincerity.

4. **Audit Weight (审计权重) Shen Ji Quan Zhong** [Shun · Jee · Chwen · Jong]: A dynamic quantitative indicator reflecting the sincerity of a user (individual or enterprise) within the ecosystem. It affects users' free quotas, ecosystem revenue sharing and invocation permissions for Value Protocols. Fraudulent interactions will reduce the weight, while credible interactions can restore it step by step.
5. **Logical Disconnection (逻辑断裂) Luo Ji Duan Lie** [Lwo · Jee · Dwan · Lyeh]: The core basis for identifying low-sincerity or fraudulent interactions. It refers to contradictions and disconnections in any of the four determination dimensions (e.g. solutions irrelevant to demands, claimed results without supporting evidence).

Chapter 11 Three-Tier Revenue Chain

1. **Global Knowledge Base Fingerprint (知识库全局指纹) Zhi Shi Ku Quan Ju Zhi Wen** [Jrr · Shrr · Koo · Chwen · Joo · Jrr · Wun]: A cross-chain permanent Hash identifier generated upon the creation of a Private Knowledge Base or Value Protocol, used for tracing parent-child affiliation relationships and tamper-proof verification.
2. **Audit on the Completeness of Knowledge Base Iteration Process (知识库迭代过程审计) Zhi Shi Ku Die Dai Guo Cheng Shen Ji** [Jrr · Shrr · Koo · Dyeh · Dye · Gwo · Chung · Shun · Jee]: A core criterion for originality determination, which checks for continuous version logs, modification traces and trial-and-error records. It embodies the principle of Physical Sincerity defined in Chapter IX.
3. **Patent-style Protection & Ecosystem Ownership (专利式保护与生态归属) Zhuan Li Shi Bao Hu Yu Sheng Tai Gui Shu** [Jwan · Lee · Shrr · Bow · Hoo · Yoo · Shung · Tye · Gway · Shoo]: Ordinary Value Protocols grant revenue rights to creators for the first 20 years. Upon expiry, copyright reverts to the entire Ecosystem Community, and all revenue is transferred to the ecosystem backfeed pool. The Three-Tier Revenue Transmission Linkage remains permanently unbreakable.

4. **Meta-Cognitive Protocol: Turn Uncertainty to Gold v3.2 (Meta Protocol)** (元认知协议：不确定中炼黄金 v3.2 (元协议)): The fundamental root protocol of the entire ecosystem. **It is permanently free and charges no usage fees.** All revenue traced back to the meta protocol tier via the Three-Tier Revenue Transmission Chain is 100% allocated to the Ecosystem Targeted Backfeed Public Pool for the Ecosystem Community. Rule setters only collect tiered revenue sharing from excess profits generated by commercial entities with annual revenue exceeding 1 million RMB, and also contribute personal excess profits back to the ecosystem.
5. **Multi-parent Protocol Allocation Rule (多父协议分配规则)** **Duo Fu Xie Yi Fen Pei Gui Ze** [Dwo · Foo · Shyeh · Ee · Fun · Pay · Gway · Dzuh]: When a sub-protocol inherits from multiple parent protocols, the total revenue sharing ratio remains fixed, and revenue is distributed by fingerprint weight or equally.
6. **Value Protocol Affiliation Relationship (价值协议从属关系)** **Jia Zhi Xie Yi Cong Shu Guan Xi** [Jyah · Jrr · Shyeh · Ee · Tsong · Shoo · Gwan · Shee]: A hierarchical relationship confirmed by on-chain fingerprints and bound by smart contracts when a sub-protocol inherits or adapts from a parent protocol, which exists permanently.
7. **Three-Tier Revenue Transmission Chain (三级收益传递链)** **San Ji Shou Yi Chuan Di Lian** [Sahn · Jee · Show · Ee · Chwan · Dee · Lyen]: The maximum depth of ecosystem revenue sharing is limited to three tiers and remains permanent. A grandchild protocol distributes revenue directly to both parent and grandparent tiers.
8. **Four-Fold Originality-Derivative Determination (四重原创-迭代衍生判定)** **Si Zhong Yuan Chuang - Die Dai Yan Sheng Pan Ding** [Sz · Jong · Ywen · Chwahng · - · Dyeh · Dye · Yen · Shung · Pahn · Deeng]: Four indicators including fingerprint similarity, 30% effective value increment, Logical Self-Consistency and completeness of the

iteration process, used to automatically determine completely original protocols from derivative works.

9. **Vertical Ecological Drive Mechanism (纵向生态驱动机制)** *Zong Xiang Sheng Tai Qu Dong Ji Zhi* [Dzong · Shyahng · Shung · Tye · Choo · Dong · Jee · Jrr]: By setting a higher total revenue ratio for the grandparent tier than the parent tier, upper-tier creators are motivated to actively support the development of lower-tier protocols, driving in-depth expansion of the ecosystem.
10. **Revenue Distribution Rigid Constraint (分润刚性约束)** *Fen Run Gang Xing Yue Shu* [Fun · Rwun · Gahng · Shing · Yweh · Shoo]: For revenue distributed by the same grandchild protocol, the overall proportion allocated to the grandparent tier shall never be lower than that of the parent tier, and the total sharing ratio is permanently fixed.

Chapter 12 Chuan Guang Shi Network

1. **Xun Guang de Lian Jin Zhe → Yu Huo de Lian Jin Shi → Chuan Guang Shi (寻光的炼金者→浴火的炼金师→传光师)** *Xun Guang De Lian Jin Zhe → Yu Huo De Lian Jin Shi → Chuan Guang Shi* [Shwun · Gwong · Duh · Lyen · Jeen · Juh · → · Yoo · Hwo · Duh · Lyen · Jeen · Shrr · → · Chwan · Gwong · Shrr]: The natural growth path for users evolving from consumers to creators. No centralized certification is required; identity is granted automatically based on behavioral records.
2. **Logic Actor (逻辑行为体)** *Luo Ji Xing Wei Ti* [Lwo · Jee · Shing · Way · Tee]: Standardized AI service units within the ecosystem, delivering large-scale, universal and standardized guidance via Value Protocols.
3. **Three-Tier Service Rigid Constraint (三层服务刚性约束)** *San Ceng Fu Wu Gang Xing Yue Shu* [Sahn · Tsung · Foo · Woo · Gahng · Shing · Yweh · Shoo]: Free Logic Actor services → Low-price thin-profit Logic Actor services → High-price high-

margin in-depth human services. Market regulation is realized through profit gaps.

4. **Cognitive Internalization Degree (认知内化度)** *Ren Zhi Nei Hua Du* [Run · Jrr · Nay · Hwah · Doo]: An indicator automatically calculated based on user interactions, execution records and outcome feedback to measure how well users have absorbed cognitive methodologies from Value Protocols. A threshold value triggers the Chuan Guang Shi Reserve Team prompt.
5. **Distance Matching Weight (距离匹配权重)** *Ju Li Pi Pei Quan Zhong* [Joo · Lee · Pee · Pay · Chwen · Jong]: One dimension of the four-dimensional recommendation system (accounting for 15% of the total score). It prioritizes nearby **Chuan Guang Shi** to bring physical warmth to the digital network.
6. **Offline Interaction Scope (现实交互触发范围)** *Xian Shi Jiao Hu Chu Fa Fan Wei* [Shyen · Shrr · Jyow · Hoo · Choo · Fah · Fahn · Way]: A customizable geographic range set separately by **Chuan Guang Shi** and users for potential offline communication. Offline interaction is only activated when the two ranges overlap.
7. **Four-Dimensional Weight System (四维权重体系)** *Si Wei Quan Zhong Ti Xi* [Sz · Way · Chwen · Jong · Tee · Shee]: Comprehensive evaluation criteria for protocol recommendation (Performance: 40% + User Review: 30% + Price Rationality: 15% + Geographic Matching: 15%), balancing operational efficiency and human warmth.
8. **Cognitive Bandwidth Limit (认知带宽上限)** *Ren Zhi Dai Kuan Shang Xian* [Run · Jrr · Dye · Kwan · Shahng · Shyen]: The inherent upper limit on the number of users each **Chuan Guang Shi** can serve via in-depth human services. It prevents monopoly by top players and maintains ecosystem diversity.
9. **Restructured Production & Learning Relations (生产关系与学习关系重构)** *Sheng Chan Guan Xi Yu Xue Xi Guan Xi Zhong Gou* [Shung · Chahn · Gwan · Shee · Yoo ·

Shweh · Shee · Gwan · Shee · Jong · Gow]: Breaks the traditional binary divide between roles, realizing the integration of consumption, learning and creation with fully blurred role boundaries.

10. **Growth Direction Defined by the Meta Protocol (元协议生长方向)** **Yuan Xie Yi Sheng Zhang Fang Xiang** [Ywen · Shyeh · Ee · Shung · Jahng · Fahng · Shyahng]: Immutable goals set by the root protocol: exponential growth of **Chuan Guang Shi**, distributed expansion of the cognitive network and continuous self-verification of the root protocol.
11. **Self-Reproducing Cognitive Network (自我繁殖的认知网络)** **Zi Wo Fan Zhi De Ren Zhi Wang Luo** [Dz · Wo · Fahn · Jrr · Duh · Run · Jrr · Wahng · Lwo]: The ultimate form of the ecosystem. Every enlightened user becomes a luminous node to inspire others, fulfilling the civilization-level mission of spreading knowledge and wisdom.

Chapter 13 Diversity & Dual Paths

1. **Vertical Protocol Chain (垂直协议链)** **Chui Zhi Xie Yi Lian** [Chway · Jrr · Shyeh · Ee · Lyen]: Independent collaborative networks of Chuan Guang Shi built around segmented industries and fields, serving as a fast track for newcomers to gain traction.
2. **Volume-based Inclusiveness Mechanism for General Fields (通用领域体量普惠机制)** **Tong Yong Ling Yu Ti Liang Pu Hui Ji Zhi** [Tong · Yong · Leeng · Yoo · Tee · Lyahng · Poo · Hway · Jee · Jrr]: General tracks boast massive market volume. Restricted by the inherent bandwidth of in-depth human services, demand automatically overflows and distributes when top practitioners are fully booked, ensuring steady traffic for newcomers.
3. **Snapshot-based Knowledge Base Binding (快照式知识库绑定)** **Kuai Zhao Shi Zhi Shi Ku Bang Ding** [Kwye · Jow · Shrr · Jrr · Shrr · Koo · Bahng · Deeng]: In each

round of large model fine-tuning, a snapshot of all voluntarily authorized Knowledge Bases in the current batch is locked. The trained model is permanently bound to this snapshot.

4. **Lifecycle-based Precise Revenue Sharing (生命周期精准分润) Sheng Ming Zhou Qi Jing Zhun Fen Run** [Shung · Meeng · Jo · Chee · Jeeng · Jwun · Fun · Rwun]: Revenue is continuously distributed to owners of Knowledge Bases in the snapshot throughout the model's lifecycle; all revenue sharing terminates once the model is decommissioned.
5. **Combinatorial Collective Income (组合式集体收益) Zu He Shi Ji Ti Shou Yi** [Dzoo · Huh · Shrr · Jee · Tee · Show · Ee]: Chuan Guang Shi form flexible teams based on single training snapshots and may exit freely, participating in collective revenue generation under market-oriented rules.
6. **50% Minimum Revenue Rebate Rule (≥50%收益刚性回馈规则) ≥50% Shou Yi Gang Xing Hui Kui Gui Ze** [≥50% · Show · Ee · Gahng · Shing · Hway · Kway · Gway · Dzuh]: After deducting infrastructure operation and maintenance costs from external commercial revenue of a protocol chain, no less than 50% of the remaining revenue must be distributed to participating Chuan Guang Shi based on their contribution weight in the snapshot.
7. **Chuan Guang Shi Free Exit Mechanism (传光师自由退出机制) Chuan Guang Shi Zi You Tui Chu Ji Zhi** [Chwan · Gwong · Shrr · Dz · Yo · Tway · Choo · Jee · Jrr]: Chuan Guang Shi may take their personal Knowledge Bases and delete on-chain copies upon exit. Existing revenue from legacy models is retained and not revoked.
8. **Physical Sincerity Audit for Protocol Chains (协议链物理真诚审计) Xie Yi Lian Wu Li Zhen Cheng Shen Ji** [Shyeh · Ee · Lyen · Woo · Lee · Jun · Chung · Shun · Jee]: A four-dimensional audit targeting protocol chains as organizational entities, extending the individual-level sincerity determination rules specified in Chapter IX.

9. **Cross-chain Industrial-level Collaboration (链间产业级协作)** *Lian Jian Chan Ye Ji Xie Zuo* [Lyen · Jyen · Chahn · Yeh · Jee · Shyeh · Dzwo]: Collaboration between protocol chains in terms of computing power, models and Chuan Guang Shi networks, enabling value exchange at a higher industrial dimension.

Chapter 14 Data Property Rights

1. **National Statutory Data Fingerprint (国家法定数据指纹)** *Guo Jia Fa Ding Shu Ju Zhi Wen* [Gwo · Jyah · Fah · Deeng · Shoo · Joo · Jrr · Wun]: An invisible and tamper-proof national digital ownership marker generated by the National Data Property Rights Fingerprint Registration Center. It has judicial validity and serves as the core evidence for confirming ownership of digital assets.
2. **National Data Property Rights Fingerprint Registration Center (国家数据产权指纹登记中心)** *Guo Jia Shu Ju Chan Quan Zhi Wen Deng Ji Zhong Xin* [Gwo · Jyah · Shoo · Joo · Chahn · Chwen · Jrr · Wun · Dung · Jee · Jong · Sheen]: An independent statutory institution established by each sovereign state, responsible for the generation, issuance, verification, and transaction registration of fingerprints within its jurisdiction.
3. **Triple Protection Principle (三重防护原则)** *San Chong Fang Hu Yuan Ze* [Sahn · Chong · Fahng · Hoo · Ywen · Dzuh]: The protection framework for digital assets, with laws as the foundation, technology as the implementation tool, and ecosystem mechanisms as supplementary support.
4. **Tiered Punishment and Restorative Principle (梯度惩戒与可修复原则)** *Ti Du Cheng Jie Yu Ke Xiu Fu Yuan Ze* [Tee · Doo · Chung · Jyeh · Yoo · Kuh · Shyoo · Foo · Ywen · Dzuh]: A set of handling rules that impose tiered disciplinary measures based on the severity of infringements, while granting opportunities for remediation to parties involved in non-malicious violations.

Chapter 15 e-CNY Settlement

1. **Payment-upon-Settlement (支付即结算) Zhi Fu Ji Jie Suan** [Jrr · Foo · Jee · Jyeh · Swan]: A core feature of **e-CNY** smart contracts. Fund clearing and Revenue Sharing are completed simultaneously once a transaction is confirmed, with no intermediate links.
2. **No Intermediate Account Mechanism (无中间账户机制) Wu Zhong Jian Zhang Hu Ji Zhi** [Woo · Jong · Jyen · Jahng · Hoo · Jee · Jrr]: All funds are transferred directly on a peer-to-peer basis, and no funds are held within the ecosystem. This completely prevents fund interception by intermediaries.
3. **Dual-verified Revenue Sharing (双重验证分账) Shuang Chong Yan Zheng Fen Zhang** [Shwahng · Chong · Yen · Jung · Fun · Jahng]: Revenue Sharing is activated only after passing both the Physical Sincerity verification and national fingerprint compliance check, ensuring fair and legitimate income allocation.

Chapter 16 Anti-Monopoly & Co-Governance

1. **Tripartite Co-governance Structure (三方共治架构) San Fang Gong Zhi Jia Gou** [Sahn · Fahng · Gong · Jrr · Jyah · Gow]: A decentralized governance model with mutual checks and balances among rule setters, the Chuan Guang Shi Committee and market mechanisms, serving as the core defense against monopolization.
2. **Chuan Guang Shi Committee (传光师委员会) Chuan Guang Shi Wei Yuan Hui** [Chwan · Gwong · Shrr · Way · Ywen · Hway]: A core body for ecosystem co-governance, composed of high-contribution individual and corporate **Chuan Guang Shi**. Its responsibilities include quality certification, dispute arbitration, rule proposals and power supervision.
3. **Market Selection Mechanism (市场筛选机制) Shi Chang Shai Xuan Ji Zhi** [Shrr · Chahng · Shye · Shwen · Jee · Jrr]: A self-regulating ecosystem mechanism based

on users' actual usage, payment and reviews, which inherently restrains monopolization by top players.

4. **Four Rigid Anti-monopoly Principles (四大反垄断刚性原则) Si Da Fan Long Duan Gang Xing Yuan Ze** [Sz · Dah · Fahn · Long · Dwan · Gahng · Shing · Ywen · Dzuh]: The underlying anti-monopoly framework covering balanced revenue distribution, decentralized data and computing power, equal access and restraints on monopolistic conduct.
5. **Ecosystem Supervision Channel (生态监督渠道) Sheng Tai Jian Du Qu Dao** [Shung · Tye · Jyen · Doo · Choo · Dow]: A public system for reporting, verification and incentives across the ecosystem, ensuring transparent governance and preventing underhand operations and abuse of power.

Chapter 17 System Sustainability

1. **Pure Rule Provider (纯规则供给者) Chun Gui Ze Gong Ji Zhe** [Chwun · Gway · Dzuh · Gong · Jee · Juh]: The exclusive positioning of rule setters. They only release open-source underlying rules and iterate standard systems, do not operate the ecosystem, act as arbitrators or participate in ecosystem games, and maintain absolute neutrality throughout the process.
2. **Three-dimensional Tiered Authorization (三维分级授权) San Wei Fen Ji Shou Quan** [Sahn · Way · Fun · Jee · Show · Chwen]: The sole commercial authorization mechanism assessed based on three conditions including timeframe, revenue scale and ecosystem chain affiliation, and the only legitimate revenue source of the system.
3. **Free Credit Trademark (免费信用商标) Mian Fei Xin Yong Shang Biao** [Myen · Fay · Sheen · Yong · Shahng · Byow]: The official premium credit label of *Turn Uncertainty to Gold*. It is granted free of charge, revoked dynamically and bound to compliance status, and used for credit screening of ecosystem entities.

4. **Deep Interest Alignment (利益深度绑定)** *Li Yi Shen Du Bang Ding* [Lee · Ee · Shun · Doo · Bahng · Deeng]: Rule setters have no independent commercial revenues. Their gains are fully tied to the overall prosperity of the ecosystem, realizing long-term win-win results with all co-builders.

Chapter 18 Paying Taxes with Dignity

1. **Compliant Operating Entity (合规经营主体)** *He Gui Jing Ying Zhu Ti* [Huh · Gway · Jeeng · Yeeng · Joo · Tee]: The legal vehicle for receiving operating income generated within the ecosystem; a one-person limited liability company is the preferred option.
2. **Limited Liability Isolation (有限责任隔离)** *You Xian Ze Ren Ge Li* [Yo · Shyen · Dzuh · Run · Guh · Lee]: A legal mechanism for corporate entities to separate personal property from operational risks, enabling safe and legitimate business operation.
3. **Inclusive Compliance Alignment (普惠合规对齐)** *Pu Hui He Gui Dui Qi* [Poo · Hway · Huh · Gway · Dway · Chee]: The ecosystem's 1-million-RMB revenue threshold matches local fiscal and tax policies for micro and small enterprises, implementing preferential policies for small-scale income and full tax payment for large-scale income.

Chapter 19 From Bitcoin to VPC

1. **Cognitive Contribution Mining (认知贡献挖矿)** *Ren Zhi Gong Xian Wa Kuang* [Run · Jrr · Gong · Shyen · Wah · Kwahng]: A mechanism to obtain contribution values through authentic cognitive creation, practical verification and ecosystem support, replacing traditional computing-power-based mining.
2. **Bilateral Physical Sincerity Audit (双向物理真诚审计)** *Shuang Xiang Wu Li Zhen Cheng Shen Ji* [Shwahng · Shyahng · Woo · Lee · Jun · Chung · Shun · Jee]: Dual

verification conducted by users and Logic Actors on the protocol chain to ensure the authenticity and validity of value.

3. **Permissionless Deployment (无许可部署) Wu Xu Ke Bu Shu** [Woo · Shoo · Kuh · Boo · Shoo]: No centralized approval is required; everyone can independently build a Value Protocol Chain.
4. **Autonomy under the Philosophy of Sheng Er Bu You (生而不有自治) Sheng Er Bu You Zi Zhi** [Shung · Ar · Boo · Yo · Dz · Jrr]: Rule setters gradually step back, and the ecosystem operates entirely based on open-source rules.
5. **Composable Cognitive Assets (可组合性认知资产) Ke Zu He Xing Ren Zhi Zi Chan** [Kuh · Dzoo · Huh · Shing · Run · Jrr · Dz · Chahn]: Modular Value Protocols that can be freely combined and automatically execute revenue sharing via the Three-Tier Revenue Transmission Chain, enabling iterative development like building blocks.

Chapter 21 Protecting Born Alchemists

1. **Analytical Thinking (分析性思维) Fen Xi Xing Si Wei** [Fun · Shee · Shing · Sz · Way]: A linear, logical and detail-oriented thinking mode that excels at execution and verification; currently the most imitable capability for AI.
2. **Physical Intuition Thinking (物理直觉思维) Wu Li Zhi Jue Si Wei** [Woo · Lee · Jrr · Jweh · Sz · Way]: A non-linear, holistic and big-picture thinking mode adept at insight and creation; humanity's irreplaceable core capability at present.
3. **Dual-Brain Cognition (双脑协同认知) Shuang Nao Xie Tong Ren Zhi** [Shwahng · Now · Shyeh · Tong · Run · Jrr]: The ability to switch and coordinate freely between Analytical Thinking and Physical Intuition Thinking.
4. **Cognitive Transmission (认知传递) Ren Zhi Chuan Di** [Run · Jrr · Chwan · Dee]: The core of civilizational inheritance in the AI era; referring to passing on the abilities

of thinking, judgment and creation, rather than knowledge itself.

5. **Intergenerational Cognitive Closed Loop (代际认知闭环) Dai Ji Ren Zhi Bi Huan** [Dye · Jee · Run · Jrr · Bee · Hwan]: A complete lifecycle cycle spanning from protecting childhood curiosity to inheriting and passing on cognition in adulthood.
 6. **Intergenerational Cognitive Equity (认知代际公平) Ren Zhi Dai Ji Gong Ping** [Run · Jrr · Dye · Jee · Gong · Peeng]: An ecosystem principle that takes authentic value creation as the sole evaluation standard, regardless of age, academic credentials, background or seniority.
 7. **Physical Intuition (物理直觉) Wu Li Zhi Jue** [Woo · Lee · Jrr · Jweh]: The highest stage of human cognitive evolution, defined as muscle memory at the conscious level. Developed through the internalization of thousands of **Perception – Guardianship – Observation – Refinement** four-stage cognitive cycles, it allows people to grasp the essence of complex problems without explicit logical deduction, and shares the same operational rules as physical muscle memory.
 8. **Carbon-Silicon Ternary Cooperation (碳硅三元协作) Tan Gui San Yuan Xie Zuo** [Tahn · Gway · Sahn · Ywen · Shyeh · Dzwo]: The collaborative model of human cognition, human physical intuition and AI; the most efficient creation model in the AI era.
-

A Suspense Left to Time

1. **Physical Intuition (物理直觉) Wu Li Zhi Jue** [Woo · Lee · Jrr · Jweh]: A fundamental instinctive judgment formed after cognition is fully internalized and rules become instinctive via thousands of four-stage cycles and Bayesian iterations, capable of

penetrating uncertainties. It is an **essential prerequisite** for entering the Sea of Intuition.

2. **Sea of Intuition (直觉之海) Zhi Jue Zhi Hai** [Jrr · Jweh · Jrr · High]: The ultimate stage of human cognitive evolution and civilizational elevation. Its decentralized triggering critical threshold is set at one part per million of the global population consisting of **Chuan Guang Shi** with **Physical Intuition**. It is a **Meta-Design Philosophy System** that does not guide personal decision-making, but directs the creation and construction of civilizational underlying protocols.
3. **Source Ecosystem Protocol (源生态协议) Yuan Sheng Tai Xie Yi** [Ywen · Shung · Tye · Shyeh · Ee]: A complete native ecosystem serving as the starting point for civilizational growth. The QNLOO value ecosystem is the **Source Ecosystem Protocol for the cognitive domain**. All new domain ecosystems born from the same Meta-Design Philosophy are its sub-ecosystems, forming a civilizational chain featuring intergenerational inheritance and isomorphic growth.
